Lancaster Farming

VOL. 6. NO. 14 | Lancaster Farming, Saturday, February 25, 1961 | $2 Per Year

YOUNG FRUIT TREES AND ORNAMENTAL shrubs served as the unwilling hosts to hungry rabbits during the recent heavy snows. Deep drifts around the base of this young apple tree in the backyard-orchard of Philip Owen, Willow Street R1, served as a platform for the rodents as they stripped bark from the lower limbs of the tree. Most of the limbs will have to be pruned off trees like this, but snow around the trunk kept the bark on the main part of the tree intact. —L. F. Photo

Rabbits Causing Damage To Trees, Orchardists Say

Rabbits turned from their standard diet to anything accessable during the recent deep snows, and many orchardists and home owners are seeing the results of their foraging on fruit and ornamental trees and shrubs.

In some orchards and back yard plantings, young trees were completely girdled by the rodents In cases where the damage has been severe, some reports indicate, the trees and shrubs will not survive.

In other cases, orchardists report, the rabbits stood on top of the deep snow and gnawed the bark from the lower limbs of young trees. In most cases of this kind, the tree will probably survive, but heavy pruning will be necessary to remove the branches which have been completely girdled.

County Agent, M.M. Smith said this week some of the branches can be saved if the proper action is taken before the branches start to rot at the damaged places.

Smith recommends removing all branches that have been completely girdled and applying a coat of yellow shellac to the spots where the bark is removed from a portion of the branch.

The shellac, Smith said, will protect the exposed wood and help the bark heal over If the skinned areas are not coated with something such as yellow shellac rot may set in and destroy the branch, he pointed out.

The recommendation is about the same for fruit trees or ornamental shrubs, Smith said

More Cows Not Answer, Co-op Members Are Told

The pressure to "get big or get out" is not the answer to economical dairy production, members of the Southeastern Pennsylvania Artificial Breeders Cooperative were told Thursday nite.

Harvey Shaffer, extension dairy specialist from Pennsylvania State University, speaking to approximately 200 members in their district meeting at Landisville fire hall, told the dairymen they will feel increasing pressures to increase the size of their cow herds.

He said Dairy Herd Improvement Association herds have been increasing at the rate of about one cow per year in recent years and now average 31.9 cows per herd. This trend is likely to continue, he said, but where land acreage, barn room or labor are limiting factors, expanding the dairy herd will not solve the economic problem of the dairyman.

Good management of the cows now in the herd may be a more practical way to

Flory Ayrshire Receives Honor

A registered Ayrshire owned by Miss Florence Mae Flory, Manheim R3, has been named an honorable mention Junior All-American Senior Yearling, it was announced this week.

DaDvid Gibson, Jr., executive secretary of the Ayrshire Breeders' Association, Brandon, Vermont, announced that Mountain Valley Po Beauty, Miss Flory's 4-H club project was selected from junior animals from through out the country. Fifteen ayrshire judges placed the entrants

Miss Flory's heifer placed first in competition at the Southeastern Pennsylvania Artificial Breeding Cooptrative, Lancaster County -4H Dairy, Southeast District 4-H and Pennsylvania Junior Dairy shows last year She was third in Farm Show competition in January

Farm Calendar

Feb 25—12:00 noon - Bred gilt sale sponsored by the Lancaster County Swine Producers Association, at Blue Ball sales barn.

February 27—7:30 p.m. - Meeting of the county FFA at the New Holland High School Conferring of Red Rose Farmer Degrees.

7 30 p m. - Southern County 4-H Tractor club meets at the shop of C E Wiley & Son, Quarryville

8 00 p m - Reorganizational meeting of the Red Rose Dairy Herd Improvement Association board of directors at Production Credit, Roseville Road, Lancaster.

February 28—9:30 a.m. to 3 00 p m - first annual county soils day, at the Guernsey Sales Pavilion, Lincoln Highway, east of Lancaster.

7 30 p m - Lancaster area 4-H tractor club meets at Snavely's Farm Equipment in New Holland

7 30 p m. - Northeast tractor club meets at Chester Long's in Akron.

6 30 p m Annual meeting of District seven of Interstate Milk Producers' cooperative at the Blue Ball fire hall.

March 1—All Day - Annual Southeast District conference for extension workers at the Cocoa Inn, Hershey. Four county executive committee members will attend the conference

7 30 p m. - Meeting of 4-

Beimsderfer To Be Speaker At Soil Conservation Banquet

Dr. D. L. Beimsderfer, president of the Millersville State College, will be the principal speaker at the annual banquet of the Lancaster County Soil Conservation District next week.

Henry Hackman, Manheim R2, vice president of the county SCD will show colored slides of rural life in Poland. Hackman took the slides during a tour of Poland last year when he was an exchange visitor sponsored by the Brethren church

The banquet, scheduled for 6:30 p.m., will be held in the First Evangelical United Brethren Church, Ephrata, on March 2. The church is located on the corner of Locust and Church streets two blocks north and one block west of the square in Ephrata

The date of the banquet was originally scheduled for March 1, but had to be postponed to the following night

Scholarship Fund

Home Ec Grant To County Girl

A former county 4-H member has been awarded the Extension Homemakers Scholarship award, it was announced this week.

Mary Grube, daughter of Mr. and Mrs. John B. Grube, Lititz R3, a jr. Home Economics student at Mansfield State College, this week was the recipient of a $150 scholarship award.

Each year since the origin

MARY GRUBE

of the program, Lancaster County has contributed to the Extension Homemakers Scholarship award Fund, Mrs Norma DeLellis, Associate County Home Economics Agent said in making the award public.

Awards from the fund are made anually to students at Pennsylvania State University as well as other colleges in the state offering a Home Economics curriculum

Miss Grube, while a member of the Lancaster County 4-H clubs, completed projects in foods, clothing and junior leadership. She was the president of her local club in 1957. During the same year she was named state winner in the poultry foods demonstration as well as in the county dress review

At her college, Miss Grube is a member of Kappa Omicron Phi, Omicron, Gamma Pi, the college band and the college players She has been on the Dean's List for scholarship for two semesters.

Miss Grube was nominated for the award by members of the Lancaster County Extension Association, but recipients of the awards are selected by the colleges in which the applicants are enrolled.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days will average five degrees above the normal of 27 at night and 45 in the afternoon. Temperatures will range cooler on Saturday and again Tuesday and Wednesday. Precipitation may total over ½ inch occurring mainly as rain on Saturday and part of Sunday and again towards the end of the period.

USDA Reports

Face Fly Problem Partly Solved

Livestock raisers and dairymen who last year saw the face fly becoming a problem on their cattle and finding very little in the way of effective control measures will be cheered by reports from the US Department of Agriculture this week.

Year-round research to find ways of controlling the face fly,has been made possible by development of a laboratory method of rearing these flies.

John H Fales and his coworkers of USDA'S Agricultural Research Service have succeeded in propagating the insects through eight generations in an effort to build a colony large enough to permit experiments aimed at development of suitable control measures

The face fly, looks very much like a house fly. It is common in Europe and Asia and was first found in the United States (New York State) in 1953 When present in large numbers, this livestock pest reduces milk production in dairy cattle and holds down weight gains in meat animals by constantly attacking the eyes of the animals as they graze

Vintage Livestock

Slaughter Steers Sell Higher

Receipts at the February 21 sale at Vintage included 441 cattle. Compared with last week's market slaughter steers were 50 higher. Cows were 50 to 1.00 lower and bulls were 50 lower.

Several lots choice 950 to 1,110 pound slaughter steers made 26-27.10. Good & low choice were 24 to 26.50.

Cutter and utility cows brought 15.25 to 17 with canners and low cutters 13.50 to 15.25. Utility and commercial bulls were 19.50-23.

A few lots of good grade 700 to 921 pound feeder steers brought 22.50 to 23.50.

Calves: 383. Vealers mostly steady but spots 1.00 lower on high standard and low good. Good to low choice vealers made 27 to 35. Prime and choice made 35-41. Standard and low good brought 21 to 27 with utility down to 18.

Hogs: 225. Barrows and gilts were 50 lower. U. S. #1 and 2, 210-220 pound hogs 19.75 to 20.10 1 to 3, 185-220 pound hogs 18.85 to 19.-50. A few lots 232-240 pounders at 2, 3 grade 18.35 to 19. Three lots medium 146 to 169 pounds 18.10.

Sheep: 17. Not enough on sale to establish a market.

New Holland

Slaughter Steers Higher

Slaughter steers were 25 to mostly 50 higher at the February 23 auction at New Holland. Cows were 25 - 50 lower and bulls were 50 to 1.00 lower. Receipts included 805 head of cattle.

Several lots of prime grade slaughter steers weighing 1,150 to 1,300 pounds made 28.10-28.75. Bulk of choice steers 26.50-28.00. Good to low choice made 24.25-26.25. Standard sold down to 22.

Cutter and utility cows brought 15.25-17. with canners and low cutters 14.-15.-25. Shelly canners were down to 12.

Utility and commercial bulls were 19.50 to 23. A few good grade bulls up to 24.

A few lots of good grade 749 to 966 pound feeder steers were 22.50 to 24.75.

Calves: 332. Vealers were 3.00 higher. Good and choice vealers made 30-38. Choice and prime brought 38 to 43 with a few head up to 44.50. Standard and low good were 22 to 30 Utility sold down to 19.

The market was again very slow and draggy at the Feb 22 sale of dairy cows. Receipts were 139 cows, 31 bulls and six heifers.

Fresh cows, Holsteins - $300-440, Guernseys - $185-240, other breeds - $175-250 Stock bulls $110-223. Stock heifers - $75-175.

The February 20 sale of horses had receipts of 222 head. The approaching spring season influenced the market on mules and draft horses.

A feature of the sale was one load of Minnesota draft horses selling in teams from $450-620. One single draft colt, a four-year-old, sold for $300.

Draft horses - $300-620 per pair, $150-300 single. Mules pairs - $300-550, Singles $125 - 310 Pony geldings - $45 - 100 Riding horses - $120-240 Driving horses - $120-170 Killers - 8½ to 9 cents.

USE BROOMS

When heavy snow settles on ornamental evergreens and other shrubs, get out an ordinary broom to remove it, suggests Joseph Hayden, extension ornamental horticulturist at Penn State

Money may talk, but it also seems to stop talk.

Broilers Drop Full Cent

Broiler prices at the Lancaster Poultry Center dropped a little more than a cent from the high of last week, but volume increased. Prices on the 48,499 head in twelve lots ranged from 18.9 to 20-9 for a 19 21 average. The sale average of last week was 20,36, the highest in over a year. All broilers listed this week were sold Three lots of roasters were withdrawn on bids of 22 8 to 24.

Two lots of leghorn fowl brought 12 3 to 12 4 for the 2,450 head, while one lot of 350 heavy fowl made 25 1.

Two lots of 1,050 pullets crossed the block at 24.5 and 25 1 while three lots of roasters including 1,500 head changed hands at 25 7 to 27.

The complete February 23 auction offered a total of 56,965 head in 23 lots and sold 54,315 head in 20 lots

Following is the complete sale with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price

Delmarva-Georgia

Prices Lower Late In Week

Live prices averaged slightly lower during the 24-hour period ending 10:30 Friday morning.

Delmarva reported prices at farms ranging from 17-.20 to 19 60 for 733,200 head with the bulk of the sales between 18 and 18 9.

Estimated slaughter by Delmarva processors for the week end was 624,000 head cimpared with the 659,000 head last weekend

The Delmarva broiler-feed ratio for the week ending on February 17 was unchanged from the previous week at 4 2. This compares with the 3.7 ratio six months ago and 4.0 for the corresponding week a year ago.

For the week ending Feb 17 broilers, averaged 19.37 cents per pound and mash cost $91 97 per ton

Valley Run Sovereign Cinder owned by Arthur D and Mary K. Wenger, Manheim, produced 14,210 lbs. milk and 625 lbs butterfat in 294 days on twice daily milking as a 6-year-old

Curtlin Rag Apple Linda owned by Vernon R. Umble, Atglen, produced 15,757 lbs. milk and 773 lbs. butterfat in 295 days on twice daily milking as a 5-year-old.

FROM WHERE WE STAND -

Why Not Buck The Production Cycle?

Why don't producers see the peak price coming and aim for a good market?

This old question was asked again last week by one of the officers of the Lancaster Poultry Association.

We stopped in at the Poultry Center after the Thursday auction to find out the results of the sale and got into a discussion with a buyer and some of the auction personnel.

Prices at the auction were at the highest point in more than a year, but the volume at the sale was at the lowest point in several weeks.

"Prices have been advancing for several weeks. I don't gnow why more growers didn't consign broilers to this sale. The market will probably be flooded next week and knock the props out from under the sale." the buyer said.

Well there might be several reasons for the small number of broilers offered. It just might be that there are not a large number of broilers ready for the market because the low prices of the past several months have discouraged heavy placement of broiler chicks; Or it might be that the growers are hoping the peak has not yet been reached; Or it might be that the weather or a weather report caused several growers to change their minds about marketing last week.

Whatever the cause, the pattern is a well-known one. The well-known law of supply and demand still functions. When the demand is greater than the supply, prices go up and when the market is overloaded, prices tend to go down.

Doubtless the price at the Poultry Center last week will encourage some growers to place more chicks than he had planned to place or to place chicks where he had not planned to place any at all.

For this reason we have production cycles. There have been production cycles ever since man produced in surplus of his own neds and tried to dispose of his oversupply to his neighbors.

It is the normal trend to increase production during times of peak prices, but the problem is this; production begun during periods of peak prices is not ready for market until the price situation has time to endure a lot of change.

"Everyone is doing it," seems to be reason enough for some producers to increase production or to cut back production.

It is easy to do a thing when everyone else is doing it. It takes real courage to buck the trend. It takes real foresight to look at the situation as it will be, rather than as it is.

Production cycles will continue to be. Price cycles will continue to rise and fall pretty much in converse proportions. Those who jump in and out will continue to push the cycles higher and deeper.

Producers of farm products can not stop production cycles, and joining the group only makes the cycle more severe.

Why fight the cycle? You can make it work for you.

At least that's how it looks from where we stand.

Of Crows and Corn

Your editor goes through about one waste-basket-full of messages every day—messages that someone somewhere in America wants Eastern Indiana farm men to hear. (And it is a pretty good sized waste basket, too)

We are not unhappy about this. In fact we often wish that even more people from Eastern Indiana, itself, would take the time to tell their stories in The Eastern Indiana Farmer. We appreciate your mailed in and called in reports of farm organization meetings, 4-H news, and other bits of news about community happenings. What we like is for you to help us keep the news as fresh and up-to-date as possible.

But to get back to the waste-basket full, industries with new ideas for farm implements and livestock feeders, especially want you to listen to messages about their products. We usually leave this up to your local dealers, and they have something to tell you each week about vital ingredients for your farm operation when you read their advertisements.

But here is an example of what we are talking about: A release came to us recently from Saginaw, Michigan, saying that graphite sprinkled on seed-corn has been proved to have resulted in more uniform spreading because of its lubricating action in seeding machines.

This seems an interesting idea.

"There has always been the problem of seed, especially when it has been treated with insecticide, sticking together or to parts of the seeding machine," the release continued.

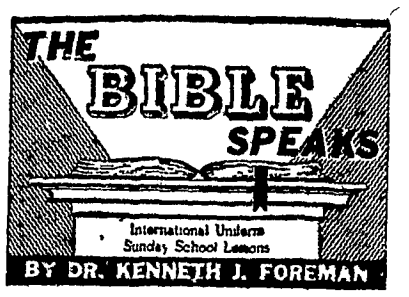
"This has resulted in wasteful and non-uniform plantings. Now, with graphite lubrication, the seeds do not adhere to each other or the machine, and uniform feeding is attained.

"Dry graphite, ground to about 200 mesh screen size, is sprinkled on the seed prior to spreading. The seeds become uniformly coated, and have a dark grayish color."

Now get this: the dark color, claims the release, offers the additional advantages of faster germinations, and less waste, **since crows are not attracted by the coated seeds.**

Now you tell us: will it work?

Incidentally, this message was sent to us for you by The United States Graphite Company. —The Eastern Indiana Farmer.



Bible Material: John 12.
Devotional Reading: Matthew 16 13-23.

Loving and Losing

Lesson for February 26, 1961

THE HEADLINE above might lead you to think this is a column about a boy and a girl. If that's what you are looking for, read no further. That's not what this is about. We are talking about something more important than an imaginary girl or boy. This is about life, your life. We may as well come to the point at once. "He who loves his life loses it." This is a quotation from Jesus Christ. As if it were not hard enough to understand by itself, Jesus adds an even harder sentence: "He who hates his life in the world will keep it for eternal life." Jesus never talked nonsense; but he often said things that made men walk away, asking themselves, What can this mean? This is one of those hard sayings.

Dr. Foreman

The Cross Is the Answer

Jesus did not explain his riddle in words. He explained it by action. Let it never be doubted that Christ was fully normal, apart from sin. "Like his brethren in every respect," a New Testament writer says Now the will-to-live is strong in every man. In some persons of unsound mind there is no will-to-live, only the will-to-die. But Jesus never strikes you (nor any one else) as a morbid type, who would go around hating himself and hating life. Jesus had a joy in living, this is clear from all we know of him. Yet he came at last to a crisis in life where he had a chance to choose to live, perhaps for many years; but chose to die. He loved life; but he would not treasure his life above all things else He loved life; but it came to the point where he knew the best investment of his life would be to "lay it down" (to use his own words).

Suppose Jesus Had Refused?

Jesus sometimes said he "had to suffer and die; but what kind of necessity what this? No outside force pushed him. True, once he got into the hands of the police the end was foreseen by every one. Yet even then Jesus said he could summon angels to his aid. And before that, it would have been perfectly simple not to offend the Pharisees and the scribes. Pilate had never heard of him and would never have heard of him if the chief priests and the rest of them had not brought Jesus before him. Jesus had no quarrel with the Roman Governor; and could have lived to a ripe old age, in retirement somewhere. But then what about the rest of us? What would we think of God? If Jesus was the divine Word made flesh, if he was God-made-man, and if he had refused the cross, then we would have known that there is one thing God would not do for man. God would teach man, condemn man, praise or punish man; but God would not die for man. God would not let himself be hurt . . . But no, Christ chose the Cross. He chose to die, not for himself alone but for every man.

The Dying Seed

Look into the garden ground after it has been planted. What do you find? To the eye, nothing, just seeds rotting in the ground, seeds that will never come out again, seeds falling apart, dying. But look again; every living seed is sending up a green stem that will hold up another plant. To have life, you must first have death to have victory, you must be willing to take scars. It is so with gardens. It is so with life. Jesus' sacrifice is not the only one needed to save the world Let us suppose for a moment that every Christian in the church were just as selfish, just as much a Me-Firster, as anybody outside the church. What would the church amount to? Nothing more than another pompous club. It would never have lasted as long as it has, of course; it would indeed never have existed at all Go over the roll of history. Some people are called "Great" when nothing about them was great except their causes. Who are the truly great? They are, they have always been those who did not love their lives. They were those who [illegible] of heroism or through long years themselves for others.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO DO SOIL TESTING—All property owners should become acquainted with the local soil testing facilities. Home owners in town, in the suburbs, or full-time farmers may have samples of soil tested for various soil elements. As soon as the samples may be taken, dried, and prepared, the services will be better during March than later in the spring.

TO KEEP DAIRY COWS WELL BEDDED — With either the stall barn or the loose housing system of handling the milking herd it is very important that the cows have plenty of clean bedding at all times. With loose housing at this time of the year it may require additional beddings in order to keep the bedded area clean; it is strongly advised that the loafing area not include any feed, water, or hay facilities so that the cows are there only for lying down on the clean, bedded area

TO PROPERLY SANITIZE DAIRY UTENSILS—Sanitizing means killing any bacteria that may have landed on the equipment since the previous milking and washing The use of the santitizer such as chlorine, iodophors, or the quaternary ammonium compounds should be applied only to clean equipment. Just prior to using the equipment, rinse the utensils with one of these santitzers, drain well and allow to stand several minutes before milking This practice will result in a lower bacteria count and higher quality milk.

TO RECOGNIZE SOIL ORGANIC MATTER PROBLEM—Many Lancaster County soils continue to be low in organic matter (humus). The great amount of complete soil testing done in recent years reveals this county to be one of the lowest in the State in this respect. Longer rotations, cover crops, sod crops, and the addition of a maximum amount of animal and vegetable waste to the soil is highly recommended. This subject will be presented at the County "Soils Day" on February 28th.

Davidson

THIS WEEK
—In Washington
With Clinton Davidson

Top Priority

President John F Kennedy and Secretary of Agriculture Orville L Freeman regard "the farm problem" as one of the toughest and most urgent domestic problems of the new Administration in Washington

In private talks with farm leaders and members of Congress they rate low net farm income and mounting surpluses a more complex and pressing problem than the business slump and rising industrial unemployment

Along with many economists, President Kennedy and Secretary Freeman believe the business decline has to a large degree been the result of the decline in purchasing power of the twenty-million people who live on farms

Also, they think the post-war record number of unemployed has been swollen by the two million workers who have left farming to seek jobs in the city during the past few years.

A new Approach

At a meeting, behind closed doors, with farm and congressional leaders recently, President Kennedy said: "I and my party have pledged ourselves to raise the income of farmers That promise we intend to keep."

He reminded the group that he was well aware of the fact that per capita farm income is less than half the national non-farm average. and that farmers can buy less with what they have to spend than at any time since 1939

"This" he said. "isn't just a farm problem. It is a nat-

In Broiler Production . . .

as in other phases of the poultry industry

SANITATION PAYS!

One of our customers, a grower with an excellent reputation, had increasingly poor results in one of his broiler flocks.

TROUBLES GALORE . . .

. . . SICKNESS

. . . AIRSAC

. . . CONDEMNATIONS, ETC., ETC.

Couldn't understand it, and for some time we could not either.

Finally some of the trouble was identified as being carried over from flock to flock by some dust left above the rafters and behind the insulation in his poultry house.

It took 300 MAN HOURS to perfectly clean this 20,000 capacity house. Everything gleamed as if brand new.

DID IT PAY?

JUDGE FOR YOURSELF!

Before the house cleaning: (20,000 bird flock)

Age	Weight	Conversion	Mortality	Rejects
9.2	3.14	2.57	11%	1153 head
10.0	3.66	2.46	6%	724 head

After house cleaning:

Age	Weight	Conversion	Mortality*	Condemnation deducted
9.1	3.86	2.28	3½%	88 lbs.

* some chick mortality due to epidemic tremors.

Moral of this story:

Good Sanitation (old fashioned cleanliness) and Profits in Mass Poultry Meat Production go Hand in Hand!

ional problem. It has become not a temporary but a chronic problem. It must be solved if we are to have a stable economy and national prosperity."

The President readily conceded that he does not know the solution of the problem. But, he insisted, we have enough able men and good brains in this country to develop a sound and workable farm program.

Three Major Goals

Secretary Freeman ,at his first conference with some 200 farm organization leaders in Washington, listed three major goats and the guiding principles "I intend to follow in our efforts to achieve those goals"

"First, we must insure the production of enough food and fiber to supply high standards for all Americans, now and in the years ahead We must distribute our abundance so that all our people are well fed.

"Second, we must assure the efficient American family farm the opportunity to achieve parity of income without exploiting either consumers or taxpayers. The government must provide to farmers, as it has provided to other groups in our economy, the tools by which they can achieve equality of economic opportunity

"Third, we must expand our programs to utilize our agricultural abundance as an instrument to encourage economic growth in underdeveloped areas of the world, as one of our greatest weapons for peace and freedom."

Rural Rhythms

FEEDING THE PHEASANT
by: Carol Dean Huber

A lovely Pheasant with golden sheen
Comes upon the wintry scene
Looking for a scrap of food
In the field beside the wood.
Snow has long been on the ground,
And no food can there be found,
Unless the farmer serves a treat
Of a little corn or wheat.

● Face Fly

(From page 1)

Keys to laboratory propagation of this insect, the entomologists found, are in proper diet and light. The adult flies are now being fed a highly nutritious diet of skim milk, sugar, pollen raw beef, malt extract, brain heart infustion, mucoproteins from animal intestines, and fresh cow manure. One by one these items are being omitted from the diet in order to determine which of them are essential dietary requirements Sun lamps and daylight fluorescent lights are used to simulate natural sunlight needed to stimulate egg laying

In studying the habits, behavior, and life cycle of these insects, the scientists have discovered that the face fly and house fly complete their life cycles in the same length of time However, the face fly spends less time in the larval stage and more in the pupal stage of growth than does the house fly

The scientists also confirmed that face fly females will lay their eggs only in fresh cow manure They would not deposit eggs in a synthetic medium used for rearing house flies The face fly also differs from the house fly by laying its eggs under the surface rather than on the surface of the medium used

The face fly caused no great concern in the United States until 1959 By that time it had spread to several eastern states It now occurs in nearly all states east of the Mississippi River, north of and including Tennessee and North Carolina, and west of the Mississippi River in Iowa, Kansas, Minnesota, Missouri, Nebraska and in North Dakota

Usually congregating on the faces of cattle and horses, the female flies feed on secretions formel around the eyelids or on mucous and salavia from the nostrils and mouth. The flies continue to attack the open eyes of older animals, and the entire body of newly-born calves

Best Food Buys
Thrifty Shoppers Save Money

Emphasis on "economy meals" continues to have appeal as we begin the second week of the Lenten observance. With a wide variety of foods in plentiful supply, foodshoppers should be able to stay within the limits of the family budget, reports Tom Piper, Penn State Extension Marketing Agent.

Look for spot bargains on pork chops, picnics & ham; chuck roast and rib steaks will headline many features on beef Lamb continues on the list of food values. Most poultry items will wear the higher price tags; frozen turkey and duckling will be the exceptions. Wholesale egg prices have advanced slightly; large size eggs, continue as the best buy on a weight basis.

Iceberg lettuce and broccoli lead the parade of values at the vegetable counter. Potatoes, mushrooms, celery, cabbage, cauliflower, onions and leafy vegetables may also be included at reasonable prices.

Sweet corn, green beans, green onions and carrots hold at firm price levels Tomato prices advanced slightly this week but considering growing and selling costs, they are still not too high. Cranberry products, rice, canned ripe olives, peanuts and peanut products are in plentiful supply and currently on the list of good buys in foods.

Fruit values are generally limited to items in heavy volume. These include bananas, grapefruit, oranges, and apples. Small sized grapefruit are the better buy Orange prices are expected to remain firm on the support of a strong processor demand.

U.S. Meat Production Rise Is Expected By Experts

The nation's cattle raisers and feeders will provide the people of the United States with a record supply of steaks, roasts, hamburgers, and other beef products in 1961, according to the National Live Stock and Meat Board Per capita consumption of beef in the coming year should amount to 83 8 pounds This is three pounds more than the average beef consumption per person in 1960, which also was a record year.

Forecasts by the United States Department of Agriculture indicate that per capita consumption of all meats—beef, veal, pork, and lamb—will reach 164 3 lbs in 1961 Larger beef supplies will be responsible for the three pound increase over 1960 While total production of meat both in 1960 and 1961 will have exceeded the record 28 billion pound output of 1956; the record per capita consumption of 166 7 pounds, established in 1956, is not expected to be broken because of the rapidly increasing population of the United States

Supplies of pork per person in 1961 will be about the same as the 64 5 pounds that the population consumed on the average in 1960, lamb will be down slightly from the 4 6 pounds figure of 1960 and veal will be up slightly from the 6 3 pounds of 1960

Penny Saving Meals

By: Mrs. Richard C. Spence

An elegant dinner need not be expensive. Proof lies in this pennny-wise menu featuring Mock Wild Rice and Liver En Casserole accompanied by Cheddar topped broiled tomatoes, sesame circles and a tossed salad of crisp greens.

Highlight this company dinner with colorful broiled tomatoes. Sprinkle a mixture of shredded sharp Cheddar cheese and buttered bread crumbs over the top surface of the individual tomatoes.Slip tomatoes under the broiler and broil until tomatoes are hot and the Cheddar melts.

With just a little ingenuity butter and sesame seed you can have tempting seasame circles to accompany the crisp salad of tossed leaf lettuce and curly endive garnished by fresh orange quarters. To make the sesame circles: butter saltine crackers and sprinkle with sesame seed. Brown in a low oven until crackers become golden, about one-half hour.

MOCK WILD RICE AND LIVER EN CASSEROLE

¼ cup (½ stick) butter
1 cup sliced celery
½ cup chopped onion
1 cup brown rice
1 pound beef liver, cut in ½-inch strips
3 cups stock or bouillon
1 teaspoon salt
½ teaspoon thyme
½ teaspoon basil
½ cup grated Parmesan cheese
1 cup dairy sour cream

In skillet melt butter; saute celery and onion. Add rice and liver; brown lightly. Add stock, salt, thyme and basil; cover and simmer about 40 minutes, stirring occasionally. Blend in Parmesan cheese and sour cream and serve. Makes 6 servings.

* * *

CHILI BEAN CHEESE CASSEROLE

1 large onion, chopped
2 tablespoons butter
1 pound ground beef
1 teaspoon salt
¼ teaspoon pepper
2 teaspoons chili powder
1 8oz. can tomato sauce
2 cups canned kidney beans with liquid—
1½ cups shredded sharp Cheddar cheese

Saute onion in melted butter. Add the ground beef and brown. When brown stir in the salt, pepper, chili powder and tomato sauce; simmer 10-15 minutes. Add kidney beans together with the can liquid and heat thoroughly. Stir in shredded cheese until melted. Sprinkle additional shredded Cheddar cheese on top before serving. Makes 6 servings.

* * *

PUFFY EGGS SUPREME

6 eggs
⅓ cup milk
1 teaspoon salt
⅛ teaspoon pepper
¼ pound cubed sharp Cheddar cheese

Beat eggs, milk, salt and pepper until frothy. Pour into a buttered 1-quart casserole. Add cubed cheese and bake in a preheated oven (350 degrees) for 30 minutes. Serve with buttered toast points. 6 servings.

* * *

CHEESE & VEAL BIRDS

1½ pounds veal steak
Salt and pepper
8½-inch sticks sharp Cheddar cheese
¼ cup (½ stick) butter
1 medium onion
1 8 oz. can tomato sauce
¼ teaspoon oregano

Pound veal steak until thin. Cut into 8 strips. Sprinkle with salt and pepper. Roll a stick of cheese within each veal piece. Fasten with wooden pick and roll in flour. Melt butter in skillet; add meat and onion, minced. Brown veal; add tomato sauce and oregano. Cover and simmer 20-25 minutes. 4 servings.

CRUSTY FISH FRY

2 pounds fish fillets
2 cups buttermilk
1 cup yellow corn meal
1 cup flour
1 teaspoon salt
Dash pepper
½ cup (1 stick) butter

Dip fish fillets in buttermilk. Roll in mixture made by combining corn meal with flour, salt and pepper. Melt butter in skillet and saute fillets about 5 minutes or until golden brown. Drain before serving. Makes servings.

* * *

A quick and hearty casserole is the mainstay of many a winter meal. Here's a new one, "Crispy Weather Casserole", that's rich in flavor & nutrition, and very economical. Melted cheese, onions & frozen asparagus are the base for this light, meatless main dish. Top and bottom layers of crispy saltine crackers give it a satisfying, crunchy texture. Here's the recipe.

CRISPY WEATHER CASSEROLE

1 10 oz. package frozen asparagus
9 double, or 18 single Saltine Crackers
½ cup minced onions
2 tablespoons salad oil
2 cups grated process American cheese (½ pound)
½ teaspoon salt
1½ cups milk

Cook asparagus according to package directions; drain well. In greased 8"x8"x2" square pan, arrange 9 crackers. Place asparagus on top of crackers. In a saucepan, saute onions in fat until golden. Add cheese and salt; cook, stirring, until cheese is melted; pour over asparagus. Pour milk over all. Top with remaining crackers. Bake in moderate oven (350 degrees) for 45 minutes. Makes 4 servings.

* * *

While cabbage is such a good buy in markets, it is worth recalling some of the favorite old time ways of using it in family meals. There is slaw, for example. Some like it hot, some like it cold, but either way it adds flavor and nutritive value at little cost.

HOT SLAW

2 eggs
¼ cup water
3 tablespoons vinegar
½ teaspoon salt
¼ teaspoon powdered mustard
2 tablespoons sugar
Few celery seeds
1 tablespoon butter or margarine
1 pint finely shredded cabbage

Beat the eggs; add water, vinegar, salt, mustard, sugar and celery seed. Cook over low heat, stirring frequently until thick. Stir in the cabbage and mix well with the dressing. Cover and heat a few minutes. Serve hot

There are many variations The hot slaw may include sliced canned ripe olives, onion, finely chopped or shredded carrot, chopped celery or a bit of parsley. Seasonings may vary, too, according to taste.

* * *

Some quick and easy saucepan suppers—

BACON CURLS WITH BAKED BEANS

½ pound sliced bacon
1 pound can baked beans with molasses sauce
2 tablespoons chili sauce
2 teaspoons pickle relish
Brown bread

Heat beans, chili sauce, and pickle relish together in a saucepan. Fry bacon until cooked but not crisp. As each slice is removed from the pan, roll around the tines of a fork to form bacon curls. Arrange bacon curls atop hot beans. Serve with brown bread and butter sandwiches Makes 2 to 3 servings.

* * *

EASY CREAMED BEEF ON TOAST

4 ounce package sliced dried beef
½ stick (¼ cup) butter or margarine
¼ cup flour
2 cups milk
1 teaspoon minced onion
1 teaspoon prepared mustard
½ teaspoon Worcestershire sauce
4 to 6 slices toast

Cut dried beef into small pieces in a bowl. Pour boiling water over beef and drain immediately. Melt butter in a saucepan; add dried beef. Fry and toss lightly until edges are frizzled. Blend in flour. Slowly stir in milk, then add onion, mustard, and Worcestershire sauce. Stir and cook until thickened. Serve on hot buttered toast. 4 to 6 servings.

* * *

QUICK 'N EASY MEAT AND POTATOES

12 oz. can pork and beef luncheon meat
4 medium potatoes
2 tablespoons butter or margarine
1 cup milk
¼ cup chopped green pepper

Cut loaf into ¼ to ½ inch cubes Pare and cut potatoes into ½ inch cubes. Pat potatoes dry. Melt butter in large saucepan. Add potato cubes, stir and heat until the cubes are lightly browned, about 5 minutes. Add milk and meat cubes. Stir to blend. Cover and cook slowly about 5 minutes. Uncover and continue cooking until all milk is absorbed, about 20 minutes. Serve hot. 4 to 6 servings.

* * *

SAUCEPAN FRANKS-RICE SAUERKRAUT

8 franks
1 cup rice
1 cup packed sauerkraut
¼ cup catsup
1 tablespoon butter or margarine
½ to 1 teaspoon salt
2 cups water

Combine all ingredients except the franks in a heavy saucepan. Cover tightly. Simmer 10 minutes. Add franks. Cover and continue simmer-

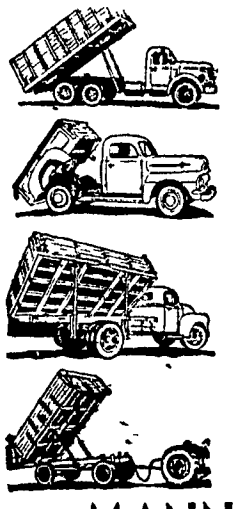
HARSH HYDRAULIC HOISTS



The 32 available models come to you with a wide range of lifting capacities ranging from 3½ to 20 tons for your truck, pickup, or trailer. The smooth, trouble-free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the $10-$15 a day you now spend to manually unload your truck.

Hydraulics Unlimited Mfg. Co.

To design and build a light-weight, low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS UNLIMITED MFG. CO. began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only $328.52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.

OLIVER

90-Bushel No. 170

Speeds Up Spreading 4 Ways

One: This brawny new, ground-drive No. 170 has extra stamina, permits spreading at higher speeds. Its stout construction also gives you additional years of service at low upkeep.

Two: The 90-bushel, rot-resistant wood box is exceptionally low, end to end, to make loading faster and easier. There's no overhead cylinder arch in the way.

Three: Perfect balance adds weight to the tractor drawbar, increases traction in soft, muddy lots and fields. The big 6-bar main cylinder and Hammermill Widespread assure fine shredding and even coverage. And you have a choice of spreading rates—4 to 24 loads per acre.

Four: A short-coupled frame simplifies backing and maneuvering. The self-locking hitch stand makes hookup convenient. Heavy-duty roller bearings in the wheels (18 or 20 inches) lighten draft. Make your next spreader a sturdy, dependable, light-running Oliver.

600 pounds of PIONEER "DRY AND FRESHENING" yields an EXTRA TON of milk!

BEFORE CALVING
This cow was fitted on Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD
The same cow after having produced 22,044 lbs. of milk and 1,[illegible] lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk.

60 DAYS ON PIONEER DRY AND FRESHENING WILL IMPROVE PROFITABILITY OF YOUR HERD

PIONEER DRY AND FRESHENING *DELIVERS*

- Up to 25% more milk
- Higher breeding efficiency
- Strong, vigorous calves
- Ease in calving
- Quick elimination of placenta
- Less udder congestion
- Better herd health

Calving stimulates a cow to produce fat beyond her ability to convert feed into milk. So, during the first months of her lactation, she "steals" milk-making nutrients from her body.

It requires only 600 pounds of Pioneer Dry and Freshening feed to repair the body tissue used during the previous lactation . . . to build a reserve of body condition for the next lactation . . . and to produce a vigorous calf.

Pioneer Dry and Fresh, fed during the dry period, is a sound investment in herd health, sustained high production, and longevity for your producing herd.

PIONEER DAIRY FEEDS

Joseph M. Good & Sons

LEOLA — QUARRYVILLE

Dairymen

(From page 1)

increase income. Shaffer cited an example of a Penna. dairyman who bought a herd of cows (grades and purebreds) without production records of any kind. With proper feed and management the herd averaged 466 lbs. of butterfat during the first full year of records.

"Are our cows better than records show?" Shaffer asked. Many dairymen could raise the production of present herds through better care and feeding.

Shaffer warned of the danger of becoming over-capitalized. He asked farmers to question their business to see if their investment is returning four per cent over a fair wage. Investment in non farm enterprizes can easily earn this much he said.

Shaffer pointed to Pennsylvania's enviable position in relation to markets. The average blend price for milk in Pennsylvania was $5.07 last year compared to $3.26 for comparable milk in Wisconsin. When milk can be shipped from Wisconsin to Pittsburgh for about $1.25 per hundredweight, we can not blame the Wisconsin dairymen for wanting part of our market, he said.

The business meeting threatened to show some of the stormy atmosphere which prevailed at last year's annual meeting when the validity of voting for director was questioned because of registration proceedures.

After a member questioned the action of the nominating committee in placing only one name in nomination for director and one name for each of three of the Sire Reporting Committees the group voted the delegate body be instructed to recommend that the nominating committee next year place at least two names on the ballot for director and each of the Sire Reporting Committees.

Earl Groff, Strasburg R-, president, explained that prior to last year two names had been proposed for each office by the committee, but through a change in the by-laws, the committee was instructed to name only one candidate. Nominations were opened to the membership Thursday night.

Abner Risser, Bainbridge R1 was reelected director for a three year term.

PROTET HOUSE PLANTS

Keep house plants away from radiators, but guard against freezing during cold nights especially where such plants are placed close to windows. Extension circular 491. "Growing Better House Plants," has other useful tips on growing plants in the home. It's available from county agricultural agents.

GETTING SET TO ENJOY homemade ice cream at a recent party sponsored jointly by the Penn Manor Future Farmers and Future Homemakers, are the presidents of the two groups. In front row left to right are Joyce Eckman, daughter of Mr. and Mrs. David C Eckman, Pequea R1, and Sterling Elmer, Jr, Lancaster R6. Looking on from the back row are members of the committee which was responsible for making the ice cream Left-to right they are Dennis Sangrey, Conestoga R2; David Siegrist, Lancaster R2, and Henry Barley, Lancaster R2, all Future Farmers enrolled in the "Boys Home Economics" class at Penn Manor High School —L F Photo

K-137 KimberCHIKS®

10c to 34c MORE NET INCOME THAN OTHER MAJOR EGG STRAINS*

(35c more than average entry in 15 tests)

*Based on final reports in 1959-60 Random Sample Tests in Ariz, B.C., Calif., Fla., Ia, Minn., Mo, C N.Y., W.N.Y., N.C., Pa., Tenn., Tex., Utah, and Wisc.

In the three 1959-60 tests in which the new K-155 Kimberchik was entered, it equalled the well-known K-137 in net income.

YOU CAN BANK ON WAYNE

Here's why. The Wayne Calf Program puts calves on dry feed fast—no growth lag after weaning—sleek, growthy heifers go into production earlier. Typical feeder reports say: **North Carolina, Philip P. Ragan,** "By using Calfnip I am able to control scours." **Wisconsin, Rufus Greutzmacher:** "I got 259 lbs. of gain on two calves for only 15c per pound." **Michigan, Gene Hepker:** "We have used Wayne for 3-4 years and are convinced that nothing can equal the Wayne Calf Feeding Program." **You too can bank on Wayne.** Continuing research assures the newest, proven developments in animal nutrition at all times. You get More for your Money with the Wayne **CALF PROGRAM.**

STOP WINTER SLUMP

Laying hens that have gone down in production during cold weather may come back to normal production if given supplemental vitamin A and D feeding oil. Just give the birds a dose of feeding oil or cod liver oil in the feed, says Herb Jordan, Penn State extension poultry specialist The local feed dealer or county agent can suggest a recommended mixture.

KILL "DIRTY RATS"

One rat will eat about 10 pounds of feed or food yearly and will contaminate nearly 10 times this amount. Stanley Gesell, Penn State extension entomologist, says there are a number of excellent rat baits on the market When used properly, they are effective and safe Follow directions carefully.

SAVE BABY PIGS

One third of all pigs born never reach market, says Les Burdette, extension livestock specialist at Penn State Cold, drafty wet farrowing pens cause most of the troubles with baby pigs The high death rate among baby pigs can often be prevented by good management.

Five Acre Corn Contest Awards To Be Made At 'Soils Day'

Awards to the winners in the 1960 Pennsylvania Five-Acre corn contest will be made at the first annual Soils Day at the Guernsey Pavilion on February 28, County Agent M. M. Smith said this week.

Blue ribbons will be presented to growers producing yields of over 150 bushels per acre; Red ribbons will go to farmers growing 125 to 149.9 bushels. All yields were based on 56 pound bushles at 15½ per cent moisture.

Blue ribbon winners with their hybrid varities, plant populations per acre and yields were as follows:

Clarence Keener, Manheim R3, Pioneer 345A, 17,900 stalks, 170.3 bu.; Harold G Rohrer, Lancaster R7, Pioneer 323, 17,600 stalks, 165.6 bu.; J. C. Garber, Jr., Lancaster R6, DeKalb 640, 18,833 stalks, 164.7 bu.

Red ribbon winners were:

Robert G. Brubaker, Mt Joy R1, Pioneer 321, 16,466 stalks, 146.2 bu.; Clarence Keener, Jr., Manheim R1, Pioneer 321, 16,233 stalks, 145.6 bu.; J. Ziegler Hess, Quarryville R3, DeKalb 640 18,600 stalks, 144.5 bu.; Geo rge W. Jackson and Son, Christiana R1, N. J. 8, 15,233 stalks, 139.5 bu.; J. Clarence Garber, Sr., Lancaster R6, DeKalb 803, 15,466 stalks, 133 1 bu.

Also in competition but failing to qualify because populations were below 14,000 were:

Josi E. Buckwalter, Lititz R3, 12,900 stalks, 141.1 bu.; James E. Buckwalter, Lititz R3, 13,433 stalks, 135.9 bu.; Richard H. Hess, Strasburg R1, 13,766 stalks, 134 5 bu

Honor Banquet Being Planned For Harry Sloat

A banquet, in tribute to retired Associate County Agent Harry S. Sloat, for his many years of service to agriculture in the Garden Spot, is being planned by the Extension Executive committee. The banquet is set for 6:30 p.m., March 8, at Hostetters' in Mount Joy.

All farmers and farm families in the county are invited to attend the banquet, but since seating capacity is limited, reservations are being accepted at the county agent's office on a "first come" basis from the first 340 folks sending requests and remittance of $2.50 per person. Deadline for reservations will be March 4.

The committee is asking farmers and farm organizations to write letters of appreciation and testimonials to be bound into a book and presented to Sloat. Letters should be written on 8½" x 11" paper and forwarded (unfolded) to the county Agent's office in the Post Office Building before March 1.

Sloat retired after 40 years in the Extension Service in the county, on January 31 of this year.

1941—*20th Anniversary*—1961

COWS and GOOD FEED

are a money-making combination

If you have home-grown grains to use for feeding, mix them with

RED ROSE®

32% Dairy Supplement

RED ROSE 32% DAIRY SUPPLEMENT is a pure high-protein feed Dairymen use it with their home grains because it contains many milk-making properties not found in grain alone. When you use Red Rose 32% Dairy Supplement you can mix dependable palatable and economical rations balanced with necessary proteins, vitamins, minerals and other nutrients—all included in the Supplement—to fit any type of roughage You'll maintain top milk production, too . . and earn better profits. We'll gladly recommend the mixtures best suited to your needs.

if you're getting the best chicks,

get the best feed too!

Good chicks today are worth real money. And so is good feed. Since a chick needs only 2 or 3 pounds of starter, it pays to feed the best.

that's why we recommend Ful-O-Pep Chick Starter.

see or call us before your chicks arrive
